

PRESS RELEASE FOR IMMEDIATE RELEASE:

Combining two machines into one, Polypack's new CPT is a turnkey solution for collating and loading products into a tray, then shrinkwrapping the tray to create a distribution and retail-ready pack.

## CPT: A HIGH SPEED, FULLY INTEGRATED TRAY AND SHRINK SYSTEM

Polypack now offers a fully integrated tray loader-former and shrink wrap system built to accommodate various product sizes and configurations. Whereas previous systems were actually comprised of two separate machines and PLCs, this new machine combines both into one cohesive system. Named the CPT, this new machine is a hybridization of our Clearprint shrink wrappers and TR series tray loader-formers.

- Eliminate costly RSCs and milk crates from your supply line
- Create palletizable distribution and retail-ready multipacks
- Run both clear and printed shrink film to fulfill distribution and retail needs
- Run at speeds up to 60 trays per minute
- Simplified interface via a single PLC
- Simple and fast changeovers
- Washdown packages available
