COMPANY OVERVIEW

For 50 years, Polypack, Inc. has supplied the finest shrink wrapping and bundling equipment to many industries including the dairy, personal care, pharmaceutical, nutraceutical, beverage and food processing industries. Polypack continues to innovate by integrating robotics, servos, and unique packaging features and configurations never before seen in the marketplace.

Polypack's product line has evolved from a few models of shrink wrappers to a diverse range of packaging equipment. These designs include total closure forming heads (horizontal, form, fill and seal) shrink wrappers, sleeve wrap (bullseye) shrink wrappers, fully automatic tray loaders / formers, label orientation and robotic pick and place equipment, which includes our patented ROKH system.

In addition, Polypack has developed patented packaging solutions for retail packs. Polypack's Nested Packs use staggered rows for bottles, cans, or jars to create a dense, stable pack. Unlike traditional methods that rely on corrugate to align rows, Nested Packs completely eliminate the need for corrugate, and the material savings are huge. This patented pack allows for increased product quantity for a given package size, and offers unique marketing opportunities and package design possibilities.

Another unique innovation from Polypack is the groundbreaking HandleWrap technology. This patented technology utilizes an internal strip of high tensile film that fuses to the bundle's shrink film during the shrink wrap process. The end result is a fully integrated carrying handle that remains completely inside the pack until the consumer pierces through the perforated film to access it. Polypack's patented HandleWrap can be combined with Nested Pack system to create a pack that incorporates the latest, most useful packaging solutions ever seen in the industry.

All Polypack packaging equipment is engineered to shrink-wrap products of various shapes and sizes, individually or in multipack configurations, unsupported, in trays or on pads. Polypack tailors every machine to best fit our customer's needs, while maintaining modular capability.

EQUIPMENT

- TOTAL CLOSURE FORMING HEAD WRAPPERS
- SLEEVE WRAP (BULLSEYE) SHRINK WRAPPERS
- HIGH SPEED SHRINK WRAPPERS
- FULLY AUTOMATIC TRAY LOADER / FORMERS
- PATENTED ROBOTIC PICK AND PLACE SYSTEMS
- PRINT REGISTRATION BUNDLERS
- CARRY HANDLE APPLICATORS

ADVANTAGES TO SHRINK PACKAGING

- Many club stores require multipack shrink solutions from their vendors due to the lower cost of shipment, end-product disposal, and storage space.
- Shrink Film represents an enormous price advantage over traditional packaging methods.
- The low volume and weight of shrink film minimizes storage space.
- Shrink film offers protection from humidity, dust, and dirt.
- Shrink packaging allows for storage in the refrigerator, ice, or water.
- Printed shrink film is an attractive alternative to traditional packaging methods and can help increase brand awareness and loyalty.
- Up to 75% less shrink material is needed compared to corrugated products.
- Products wrapped in shrink film are tamper evident.
- For a given packaging requirement, no other form of packaging uses less resources or energy.
- Shrink film equipment requires less floor space.

THINK SAVINGS. THINK GREEN. THINK SHRINK!

PRESS RELEASE: FOR IMMEDIATE RELEASE:

TANGO w/ INLINE INFEEED

TANGO w/ SIDE INFEEED

TANGO w/ FLIGHT BAR INFEEED

THE NEW TANGO 24 SHRINK WRAPPER

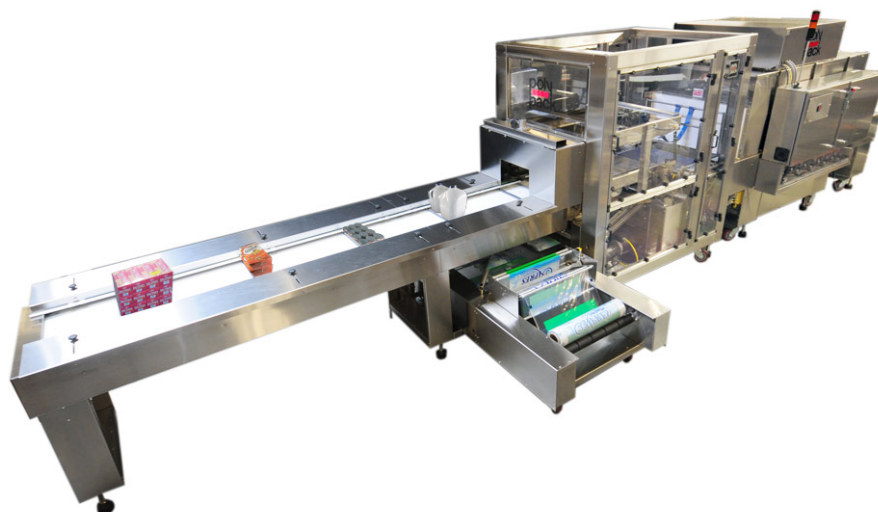

Polypack is ushering in a new generation of print registration shrink wrappers with the TANGO 24. The all new TANGO 24 is a low cost, compact, print-registered shrink bundler that offers complete versatility with three different, interchangeable infeeds. The TANGO 24 can be had with an inline infeed, and inline flood infeed, or a side infeed, flight bar infeed and these modules can be changed in less than 10 minutes. The TANGO 24 uses an intermittent motion wrapping assembly that **does not use a seal bar** and is capable of running up to 20 bundles per minute. In addition to the versatility afforded by the various infeed options, the TANGO 24 can run clear film, random pattern printed film, or print registered film! Competitively priced, the TANGO 24 is the perfect solution for slower speed lines whose products need to maintain a competitive edge in the marketplace.

Video: <http://www.polypack.com/videos/tango.wmv>

KEY BENEFITS

- *Low cost, versatile shrink wrapper with three interchangeable infeed options*
- *Run clear, random printed, or print registered film on the same machine*
- *NO SEAL BAR*
- *Affordable print-registration, starting at only \$75,000*
- *Adjustable height wrapping arm (Patent # US7328554)*
- *High efficiency shrink tunnel conserves heat and reduces energy consumption*

PRESS RELEASE: FOR IMMEDIATE RELEASE:

NEW CO-PACKER TANGO24 SHRINK BUNDLER FROM POLYPACK!

Polypack, Inc. now offers a TANGO shrink wrapper that tackles the ever-changing environment facing contract packagers. The new Co-Packer TANGO24 **runs both printed and clear film and accommodates a wide range of products**; loose, unsupported bottles, cans, cartons and trays. This machine also uses Polypack's patented adjustable height wrapping arm (**Patent # US7328554**).

Video: <http://www.polypack.com/videos/3609.wmv>

KEY FEATURES & BENEFITS:

- Versatility – Wide range of products using clear, print-registered, or random printed film
- Pick Your Pack – Create shrink bundles for both retail & distribution on one machine!
- Load your way- Hand load or automatically index product (optional auto-indexing infeed)
- Film Flexibility – Run light, medium and heavy gauge films, from 1 mil up to 3 mil!
- Single or Dual Lane - Available in single lane or optional single/dual lane operation
- Variable Speed PLC Controlled - Adjustable from 1 to 20 wraps/min. in single lane; from 2 to 40 wraps/min. in dual lane
- Fast Changeover – Minimize downtime and maximize production

PRESS RELEASE: FOR IMMEDIATE RELEASE:

HIGH SPEED WRAPPER FOR BOTH CLEAR AND PRINTED FILM

Polypack's new CLEARPRINT wrapper can run both with a quick and easy changeover. Polypack introduces its new SIMPLER, SMALLER & CHEAPER CLEARPRINT WRAPPER.

Polypack's introduces the unique CLEARPRINT wrapper series. It is simpler, smaller, cheaper, and above all, uses a patent pending integrated film perforation system which perforates the film to separate it rather than cutting the film. CLEARPRINT machines are capable of running film less than 1 mil thick and require minimum maintenance. Capable of using clear or printed film, these shrink wrappers are versatile and the changeovers are made quickly and easily. The CLEARPRINT is also offered with Nested Pack and HandleWrap options to create enhanced retail packs.

Video of Clearprint Features: <http://www.polypack.com/videos/clearprint.wmv>
Clearprint running various applications: <http://www.polypack.com/videos/cpcomp.wmv>

KEY BENEFITS:

- Affordable
- Light Gauge Film: < 1 mil or higher
- Compact Size: 25 feet
- Stainless Steel
- Simplicity
 - a. No Seal Bar – Uses perforated film separation system (**Patent # US2008105578**)
 - b. No vacuum or belt positioning system
 - c. Patent pending belt drive film applicator
 - d. Allows the use of pre-perforated film (patent pending)
 - e. Patented adjustable height wrapping arm (**Patent # US7328554**)
- Runs clear or print registered film
- Available with patented Nested Pack and HandleWrap system options

PRESS RELEASE: FOR IMMEDIATE RELEASE:

POLYPACK'S NESTED PACKAGING (PATENT # US7726464)

Polypack's revolutionary Nested Bundling eliminates the need for trays and pads, creating a strong, stable pack that saves space and cuts costs on consumables. Round cans and bottles have a tendency to nest during the shrink wrapping process. Traditionally, trays or pads have been used to keep the columns/rows in line. By nesting product into a predetermined geometric shape, the end result is an extremely strong, super dense pack that can completely eliminate the need for trays or pads. This amounts to HUGE Savings!

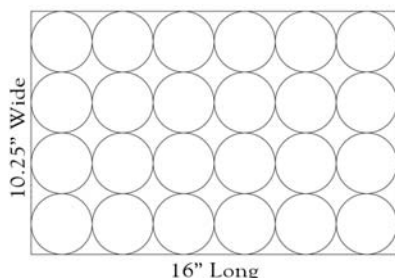

Palletizing efficiency is the same or better. The nested bundle improves space consumption on the shelves. The nested bundle's unique and eye catching look heightens the product's shelf appeal.

Nested Pack Video: <http://www.polypack.com/videos/nestedpack.wmv>

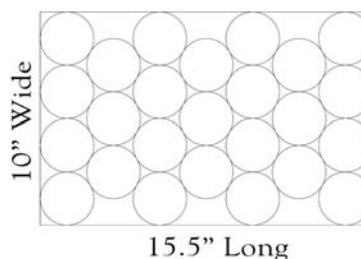

KEY BENEFITS

- Eliminates the need for trays and pads, which significantly decreases costs.
- Allows for increased product quantity for a given package size.
- Offers unique and innovative marketing possibilities and package design.

Traditional 24 pk:

Nested 25 pk:

PRESS RELEASE: FOR IMMEDIATE RELEASE:

Polypack's fully integrated HandleWrap provides a snag-free, convenient, strong carrying handle without the need for secondary equipment!

HANDLEWRAP (PATENT # US2009071102)

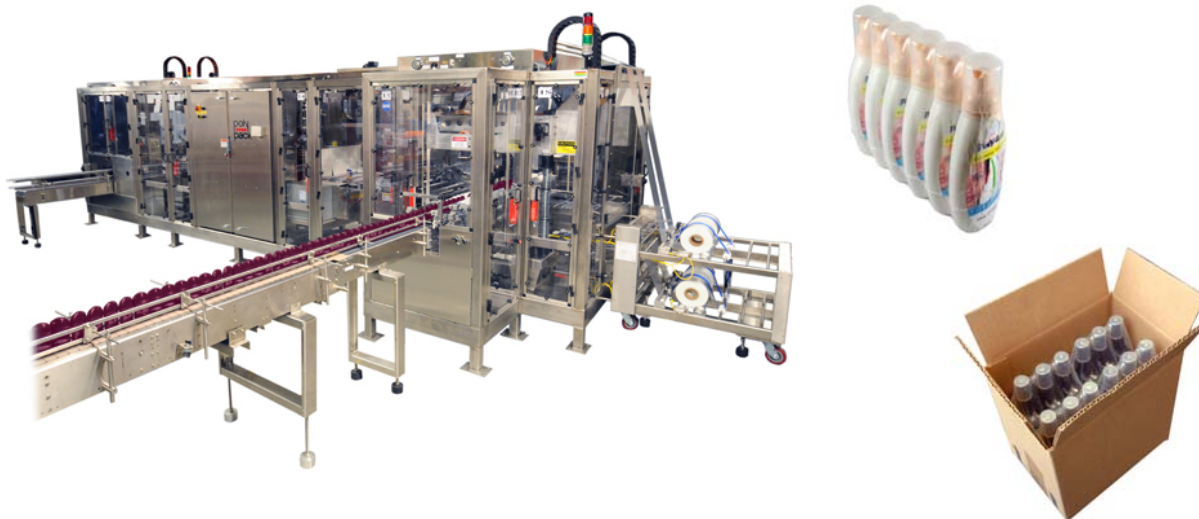

Polypack's HandleWrap is a completely integrated carrying handle that remains inside the pack until it is used. HandleWrap uses a strip of high tensile film that is applied at the same time as the bundle's shrink film, and it fuses to the pack during the shrink process. There are no tapes or tape applicators required. The HandleWrap film can be clear, colored, or random pattern printed. To use HandleWrap, the consumer locates the handle, centerline of the pack, and pierces their fingers through the perforations on top of the shrink bundle. The consumer then grabs hold of the internal HandleWrap to transport the bundle.

HandleWrap Video: <http://www.polypack.com/videos/handlewrap.wmv>

KEY BENEFITS:

- A convenient carrying handle that supports the full load of the bundle, without using corrugate.
- Does not require secondary equipment, tapes, or tape applicators.
- HandleWrap remains inside the pack until it is used, with no chance of it tearing during stacking or usage.
- Can be combined with the Nested Pack for a unique packaging solution that appeals to consumer sensibilities.

PRESS RELEASE: FOR IMMEDIATE RELEASE:

ALL-IN-ONE SHRINK WRAPPER/CASE-PACKERS FROM POLYPACK!

Polypack's new All-In-One machines are robotic pick and place shrink bundles with integrated case-packers. With quick-change gripper assemblies and adaptability to handle various types and sizes of products, the All-In-One groups products and places them onto a bucket conveyor for shrink wrapping. A discharge Gantry automatically places the bundles into an erected tray or case.

All-In-One Video: <http://www.polypack.com/videos/3542.wmv>

PICK & PLACE SYSTEM FEATURES

- Superior Product Stability
- One-time Handling
- Multiple Product Configurations
- Minimal Changeover
- Versatile Loading and Collation
- Color Touch Screen Interface
- Servo Driven
- All Stainless Steel Construction
- Tray/Case Packing Built-in
- Patented Robotic System (**Patent # US5934049**)

PRESS RELEASE: FOR IMMEDIATE RELEASE:

DAIRY SHRINK WRAPPERS MULTIPACK DAIRY CUPS WITHOUT GLUE!
POLYPACK, INC. CAN MULTIPACK DAIRY CUPS EITHER SUPPORTED OR UNSUPPORTED, WITH OR WITHOUT PRODUCT INVERSION WITHOUT TYING UP CAPITAL IN EXPENSIVE GLUE & MATERIAL CONTRACTS!

Polypack, Inc. has a new shrink wrap machine that saves you money by completely eliminating the need for glue and accompanying contracts. Unlike other machines that require glue to secure the cups to the pad for stacking, Polypack uses a unique stacking method that does not require the use of glue. The Polypack Dairy machine takes you away from the messiness and expense of glue. Liberate your production line from sticky situations with a Polypack!

Here is a video: <http://www.polypack.com/videos/3548.wmv>

KEY BENEFITS:

- Cost Savings: Eliminates glue contracts, freeing up capital for other areas of production
- Cleanliness: No messy glue preparation or cleanup
- Decreased Labor: No more time wasted on melting and cleaning up glue
- Versatility: Can be tailored for supported or unsupported applications, and inverting
- Stainless Steel Construction: Offers increased longevity and corrosion resistance

PRESS RELEASE: FOR IMMEDIATE RELEASE:

ATLANTIS SHRINK WRAP MACHINE

ENCLOSED & PROTECTED FILM CRADLE

THE NEW ATLANTIS SHRINK WRAPPER

Polypack has a new solution that addresses the issue of washdowns in production lines. The new Atlantis shrink wrapper protects the critical components from liquid intrusion. Water is extremely detrimental to the shrink properties of the film and the feature set found on the new Atlantis machine allows for washdown while protecting the critical components.

Atlantis Features & Benefits Video: <http://www.polypack.com/videos/atlantis.wmv>

KEY FEATURES:

- Waterproof front end – Encased in stainless steel to protect against liquids
- Enclosed pusher assembly – Pusher & motor are inside a stainless steel housing
- Sealed Electronics– Wiring and electrical systems are protected from liquids
- Stainless steel construction – Offers superior lifespan and washdown capabilities

PRESS RELEASE: FOR IMMEDIATE RELEASE:

DAIRY24 SHRINK WRAP MACHINE

GABLE TOP PACK W/ VERTICAL SUPPORTS

THE NEW DAIRY24 SHRINK WRAPPER

Polypack continues to solve distribution packaging issues with new and exciting machine developments. New for 2010, the DAIRY24 shrink wrapper provides an ideal packaging solution for gable top cartons. Polypack's new DAIRY24 creates palletizable shrink multipacks with both corrugate and polypropylene vertical inserts. Using the vertical inserts, Polypack's DAIRY24 shrink wrapper eliminates the traditional cardboard cases and plastic crates, which drastically reduces packaging costs and waste throughout the distribution channel.

Here's a Video: <http://www.polypack.com/videos/3564.wmv>

KEY BENEFITS:

- Materials Cost Savings – Save 35-50% compared to corrugate cases and plastic crates
- Palletizable Shrink Multipacks – easy mobility by hand truck (with pad)
- Easy Handling Bundles – compared to heavy cases and crates
- Corrugate or Polypropylene Inserts – offer superior stacking strength for Gable Tops
- Sustainability – single use recyclable materials
- Processing Advantage – allows for quick and easy refrigeration

PRESS RELEASE: FOR IMMEDIATE RELEASE:

POLYPACK'S DAIRY24 SERIES SHRINK WRAPPERS

Polypack's new DAIRY series shrink bundlers offer a great solution for dairies that need a compact, efficient shrink wrapper that can also accommodate standard washdown procedures. The DAIRY24 series includes the Gable Top Wrapper, which creates shrink multipacks with vertical supports for stacking strength.

Video of the DAIRY24 running 12 packs: <http://www.polypack.com/videos/3595.wmv>

KEY FEATURES & BENEFITS:

- Washdown Friendly Features – enclosed pusher assembly, stainless steel washdown motors, and a drip pan to protect the shrink film
- Product Barrier – for fast, reliable and precise product collation
- Small Machine Footprint – machine fits into smaller floor spaces typically found in dairies
- Stainless Constructions - offers superior service life and meets sanitation requirements

PRESS RELEASE: FOR IMMEDIATE RELEASE:

NEW POLYPAD SHRINK WRAPPERS FOR PAD APPLICATIONS

Polypack, Inc. has a new series of shrink wrap machines that save you money by eliminating the amount of corrugate involved in packaging. Instead of packing products into an erected corrugated case or tray using interior dividers, the new PolyPad series machines place product directly onto a pad and shrink wrap it, creating a stable bundle that uses up to 80% less corrugated material. As a result, the PolyPad system generates less packaging waste and saves money!

PolyPad Series Video: <http://www.polypack.com/videos/jcp.wmv>

KEY BENEFITS:

- **Cost Savings:** Drastically decreases the use of expensive corrugated materials, resulting in less capital investment
- **Green Logistics:** Generates less waste throughout the distribution channel
- **Versatility:** Machines can be tailored for total closure or bullseye wraps, using clear or print registered film
- **Stainless Steel Construction:** Offers increased longevity and corrosion resistance
- **Product Flexibility:** Easy changeovers when running different size containers

PRESS RELEASE: FOR IMMEDIATE RELEASE:

BUBBLE PACKAGING FROM POLYPACK

For over 50 years, Polypack has offered new and exciting packaging solutions in addition to the shrink bundling machinery that forms the backbone of the company. Polypack is pleased to announce the arrival of bubble packaging!

BUBBLE PACKAGING OFFERS:

- Superior Protection – bubble film covered with a secondary shrink film offers increased product stability & protection
- Reduced Packaging Costs – Huge savings vs. corrugate cases
- Sustainable Solution – packaging materials are 100% recyclable
- Billboard Opportunity - outer shrink wrap offers possibilities for branding & marketing

POLYPACK, INC. OFFERS A COMPLETE LINE OF SHRINK WRAP EQUIPMENT, INCLUDING TOTAL CLOSURE, SLEEVE WRAP, TRAY LOADERS/FORMERS AND ROBOTIC PICK & PLACE EQUIPMENT.
