## PLANT EQUIPMENT

**POLYPACK**

**Polypack has a new option** for its line of shrink packaging equipment. The inverter can be integrated with Polypack's versatile multi-packing equipment. This system is capable of receiving automatic delivery of various size and shape products, inverting every other product, and collating them into diverse size packaging configurations. Key features include automatic product inverter; horizontal rotary inverter; continuous or intermittent operation; and production speeds up to 300 products.
