SUPPLIER'S MARKETPLACE

Multi-Pack Shrink Wrapper

Polypack has introduced a packaging alternative for the dairy industry. The specialized dairy shrink-wrapping and packaging equipment has many advantages. The company says its clients have seen huge savings with bundling; savings on materials, inventory space, labor, and

time. The DAIRY24 system increases packaging efficiency. Key features include a rugged, stainless-steel, single-piece design; a thermostatically controlled, energy-efficient heat tunnel; packaging versatility ranging from two to 24 packs; speed of 30 wraps per minute; and integrated diagnostics with color touch screen. — **Polypack Inc., 3301 Gateway Centre Blvd., Pinellas Park, Fla., 33782, phone: (727) 578-5000, fax: (727) 578-1300, e-mail: info@polypack.com, Web site: www.polypack.com**
