

PACKAGING

Non-stop printing

Polypack Inc. offers a non-stop print register shrinkwrapper from Baumer. The machine runs at 200 bundles per minute on a single row, and offers automatic reel change without operator intervention. Suitable for production levels of medium- and high-speed range, the shrinkwrapper provides non-stop production during film reel change. Its fast changeover device ranges from two to 15 minutes, and an operator friendly interface with touchscreen system provides easy usage.
