PHARMACEUTICAL MULTI-PACKER

Automatic Shrink System

The PHARMACEUTICAL 16-120 machine is stainless steel, automatic, single lane, side infeed shrink multi-packer (bullseye wrapper). This machine includes state-of-the-art design, construction, operating and safety features. The highly compact design, less than 8 ft. long (total including the shrink tunnel), consists of an integrated, single frame collator/wrapper/tunnel system. Versatility in product size and pack pattern is a key benefit, as are tool-free changeovers. Custom designed and higher capacity, dual lane machines are also available.

- **Versatile (produces 3's, 6's, 8's, 9's, 10's & 12's)**
- **Bottles and boxes on the same machine**
- **Less than 3 minute tool-free changeovers**
- **Compact (less than 8' long)**
- **Single Frame Design (smooth transitions)**
- **Easy Load Film**
- **Positive Product Collation (product control modules)**
- **Color Touch Screen Interface (self-diagnosing)**
