

PH FOR DAIRY

90 degree infeed shrink bundler

Polypack's DAIRY series shrink wrap machines were designed to deliver product versatility in a small footprint with a full-featured washdown package. These machines can wrap bottles, jars, rounds and squares with quick and easy changeovers.

The pusher and seal bar on this packaging solution are designed for wrapping individual products, as well as for collating products into multipack configurations.

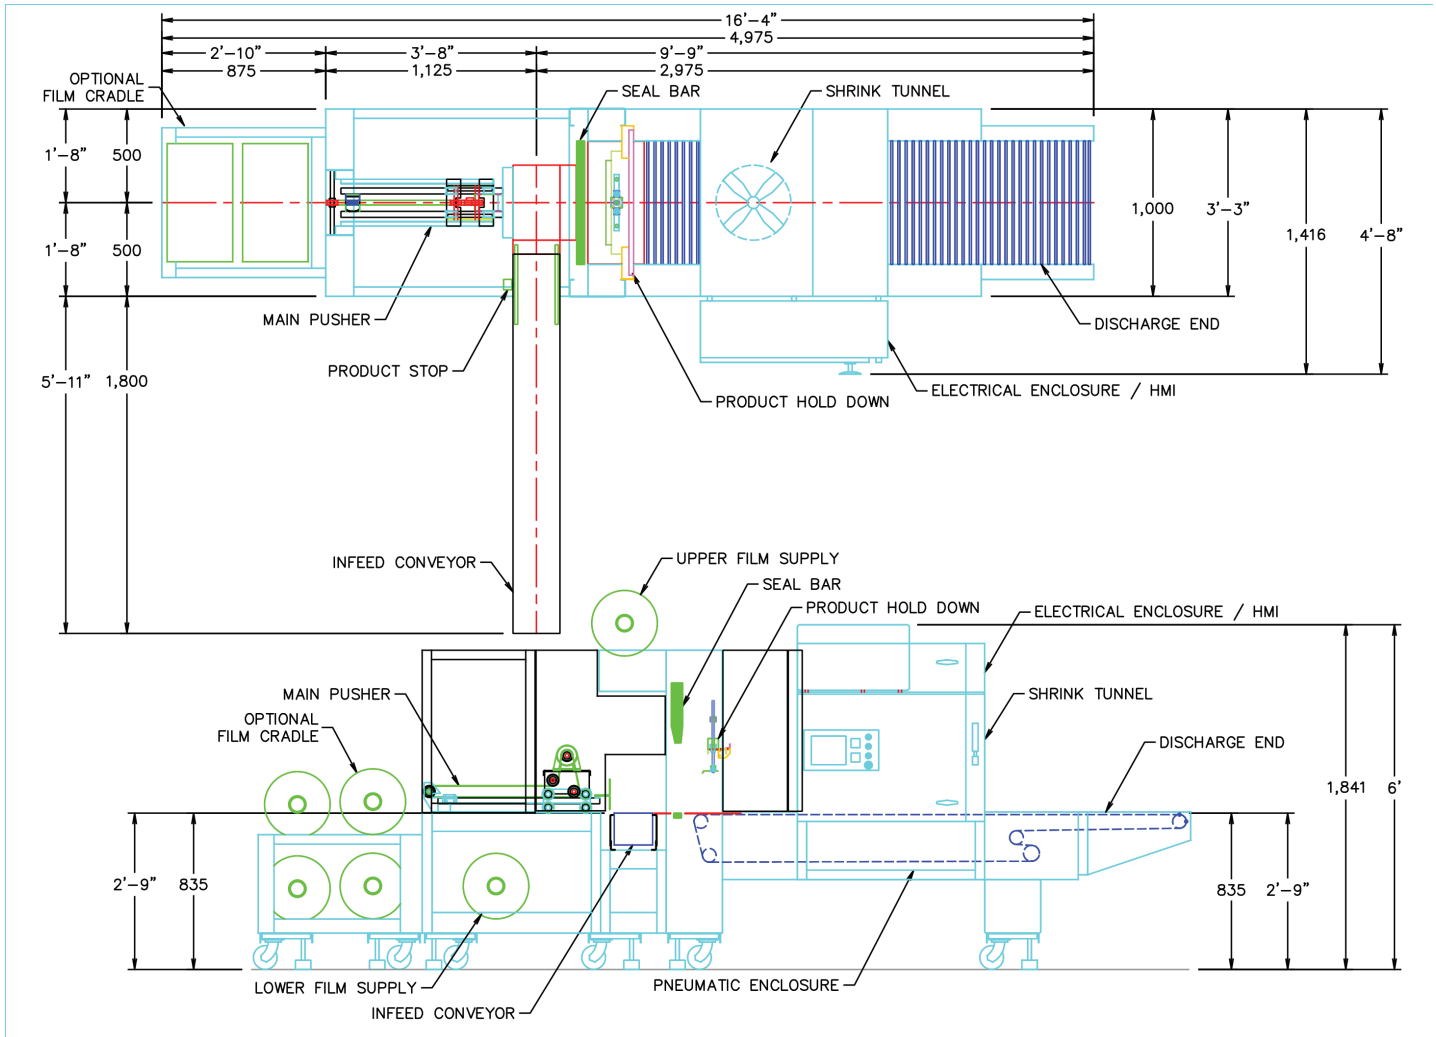

Keep Your Line Moving Fast & Faster

PH

50

Packs/ Minute

The Polypack PH wrapping machine series can be configured as single lane or dual lane packaging systems. As with all Polypack packaging solutions, these shrink wrappers can be highly customized to meet the specifications of your unique secondary packaging application.
