

# INSTABOX

## FOLD, LOCK AND READY FOR STOCK

Instabox utilizes folds and tabs which doubles the strength of the box walls. Instantly make a rigid container with no glue. The Instabox can handle trays 350mm x 500mm at speeds of up to 25 a min. Folding the walls not only creates a more sturdy container, it also gives the ability to have 4 finished interior display walls and 45° finished chamfered display edge giving the box a more finished cohesive look and design.
